# BATTERY STRAPPING TOOL [HUG]

# SEMI-AUTOMATIC BATTERY STRAPPING TOOL

The easy-to-operate battery-powered strapping tool is an entry-level model for customers who want to be flexible in terms of location, package size and strapping position. It allows strapping of a smaller number of packages without compromising efficiency and reliability. Similar to a smartphone, the device uses icons to show various parameters on its color display.

The strapping process itself is semi-automatic. The strap is placed around the package manually. Tensioning, sealing, and cutting are applied automatically at the touch of a button. The strap ends are joined via friction welding.

## TECHNICAL DATA

Performance:  
Depending on operator

Straps:  
PP straps: Width: 9–16 mm  
Thickness: 0.5–1.1 mm  
PET straps: Width: 9–16 mm  
Thickness: 0.5–1.1 mm

Strap tension:  
1,200–2,700 N (standard)  
500–1,500 N (soft strap tension)

Strapping cycles per battery charge:  
3 Ah: 150 – 350  
5 Ah: 400 – 550

Power consumption:  
approx. 0.2 W / cycle

Weight:  
incl. 3 Ah battery: 3.9 kg  
excl. battery: 3.45 kg

## STANDARD FEATURES

Battery-operated strapping tool for manual strapping with PP or PET straps

Strap ends are joined through friction welding

### Intuitive user guidance via colored touch panel

Simple operation similar to a smartphone with touchscreen and glass surface, less susceptible to wear and tear

Adjustable strap tension via touch panel

Display can be locked and unlocked with a simple finger movement

8 customizable programs for quick adjustment of parameters when changing products

Various operating modes: automatic, semi-automatic and manual

Increased stability of the tool thanks to a reinforced case

Low weight and optimal weight distribution ensure perfect ergonomics

Including 3 Ah battery and battery charger

CE marking incl. conformity declaration

## OPTIONS

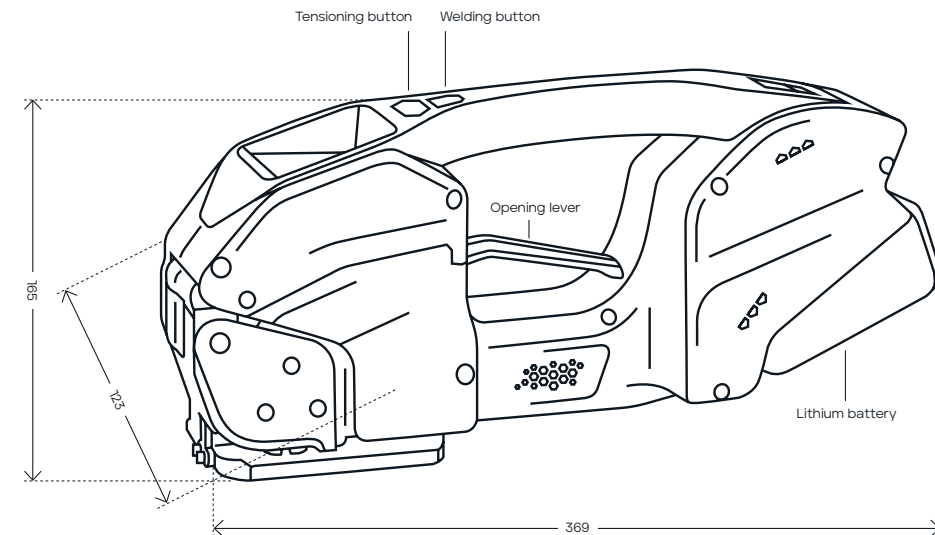

Additional 3 Ah battery

5 Ah battery for more cycles per charge

Dispenser

### Palletizing bar for convenient strapping of a pallet
